PRODUCT: Introducing Pennco KSC Oil-Fired Steam Boiler

The Pennco KSC oil-fired steam boiler now offers improved efficiency and reliability with a newly re-designed heat exchanger, patent-pending protective heat shield and an electronic low water cut-off.

New Product Highlights Include:

Energy Star Rated

- Efficiencies up to 85% AFUE on KSC-365s and KSC4100S units.

New Heat Exchanger Design (Fig. A)

- Features a modified pin deck combined with a patent pending heat shield baffle (Fig. B) to enhance heat transfer and increase the longevity of the boiler.
- A newly added electronic low water cut-off (Fig. C)
 - Does not require flushing which reduces the need for make-up water.
 - Maintains a tighter control of the water level variation during the run cycle.
 - The CycleGard features a built in anti-foaming timer.

Sight Glass and Pressure Switch Piping (Fig D)

- Now repositioned with the addition of the electronic low water cut-off.
- Also changed to brass for added longevity.

New Service Switch (Fig. E)

Other Changes Include:

- The Low Water Cut-off, Burner and Junction Box harnesses were updated to accommodate the new electronic control.
- **Important** – there are now new Beckett burner numbers due to wiring changes related to the addition of the Electronic Low Water Cut-Off. These new numbers are included on the next page. Please note: Riello and Carlin burner options will be available first quarter 2009.
